

BizCloud Experts announces acceptance into AWS WAF Service Delivery Program

Automate & Build Security directly into your applications using AWS WAF

City of Dallas, Jul 21, 2020 ([IssueWire.com](http://www.IssueWire.com)) - UberTejas LLC dba [BizCloud Experts](http://www.bizcloudexperts.com) announces their acceptance into the AWS Web Application Firewall (WAF) Service Delivery Program. [AWS WAF](#) enables Application Development teams design, deploy and protect enterprise web applications, distributed content, or APIs against common web exploits that potentially affect availability, compromise security, or consume excessive resources.

BizCloud Experts' core competency of creating web, mobile & [serverless](#) applications on AWS Cloud is further enhanced with the acceptance to Service Delivery Program for AWS WAF. AWS WAF service delivery recognition allows our developers to extend the value of building and deploying serverless solutions to now control over how traffic reaches applications by enabling security rules that block common attack patterns, such as SQL injection or cross-site scripting, and creating custom rules that filter out specific traffic patterns as defined by the security policy.

Some recent use cases in which BizCloud Experts Engineers have enabled using Amazon WAF for our enterprise customers are:

- Protecting Windows .Net Web Applications hosted on AWS against [OWASP Top 10 security risks](#)
- Providing real-time visibility and automating compliance analytics/reporting by integrating AWS WAF and Splunk/Athena
- Prevent access from & defend against attacks from known bad IP addresses/IP reputation lists

- Defend against brute-force HTTP flood attacks by setting specified threshold allocations by customer

BizCloud Experts commitment to Security and WAF is reflected in the following quote from one of our valued customers: John Nguyen, President, TLV Advanced Software Solutions: "We engaged BizCloud Experts to help us evaluate and fix our Web Application Firewall (AWS WAF) deployment. I was impressed with how the team under Nagesh's leadership quickly understood our application architecture and reconfigured the WAF aligned to our application architecture. They were agile, responsive and cost-effective. We have the confidence in the team and have now expanded our relationship with BizCloud Experts to help us deploy Cross Region Disaster Recovery Solution on AWS".

"Security and Compliance is just not about perimeter," says [Nagesh Kunamneni](#), President & CTO, BizCloud Experts. "in emerging serverless hyper-scale application environments every interaction has to be governed, monitored and continuously tested for compliance. We can help make that happen right out of the gate and seamlessly blend security into agile DevOps lifecycle".

ABOUT BIZCLOUD EXPERTS

BizCloud Experts is recognized as a leader in developing solutions using serverless computing technologies, contact center solutions, and automating IT services. BizCloud Experts is an AWS Advanced Consulting Partner that helps customers of all types and sizes design, architect, build, migrate, and manage their workloads and applications on AWS, accelerating their journey to the cloud.
